

## **Last Chance Animal List**

**Published on August 20, 2025**

Please see below for this week's Last Chance Animals list. As a reminder, **all official requests need to be submitted by 6 a.m. next Wednesday**. Below are the descriptions of the animals included on the LCA list. All the animals' observation and medical notes have also been included in an attachment for your convenience.

**ALL inquiries and requests regarding animals on the LCA list MUST be communicated to Animal Services through the [Rescue.Coordinator@ocfl.net](mailto:Rescue.Coordinator@ocfl.net) email address within the timeframe indicated. Failure to do so may result in a delay and failure of your message to reach the appropriate individuals at Animal Services.**

**Communication must be from the rescue's registered contacts.**

**Animal Services will not liaise with unauthorized personnel on behalf of the rescue.**

**Please understand we will not be able to offer extensions for any of these pets and the deadline to receive placement is firm.**

**To help offset the cost of care, Orange County Animal Services is offering rescue partners a \$200 incentive per dog for accepting any of the dogs listed below.**

### A572088 Gloria –

- Impounded 5/21/25
  - Stray
- HW (-)
- Available for both adoption and rescue placement
- Information has been shared previously with all fosters and rescue partners, no interest thus far
- Gloria has continued to display kennel reactivity with barking and lunging; she cannot safely remain in this environment long-term
- Additional medical and observation notes are attached

### A574035 Toffee –

- Impounded 6/13/25
  - Stray
- HW (-)
- Available for rescue placement only
- Information has been shared previously with all fosters and rescue partners, no interest thus far
- Toffee has displayed extremely high levels of reactivity toward other dogs while in the home setting (attacking items that show her reflection – like mirrors and the refrigerator) she cannot safely remain in this environment long-term
- \*\*\*UPDATED the attached observation notes which contain information collected from foster parent\*\*\*
- Additional medical and observation notes are attached

A577557 Ribbit –

- Impounded 8/3/25
  - Stray
- Available for rescue placement only
- Information has been shared previously with rescue partners, no interest thus far
- Ribbit has been difficult to handle during her stay, she cannot safely remain in this environment long-term
- Additional medical and observation notes are attached

## Behavior Observation Report

8/12/2025

Name and ID: \*Gloria (A572088)

**Observed By:** SLP

**Eval Type:** ABC

**Eval Location:**

Interaction: SEEK SOCIAL

ABC 175 and 181 pulled A572088 for re-assessment. A572088 continues showing kennel reactivity when in the kennel (barking, lunging, etc). Once kennel door opens and leash is presented, A572088 is loose and wiggly and allows leashing easily. In yard, A572088 is calm and gentle, seeking social with both handlers. A572088 allowed full handling without issue. A572088 was able to be placed back into kennel without issue as well. A572088 would greatly benefit from social push and/or foster due to kennel presentation.

7/22/2025

Name and ID: \*Gloria (A572088)

**Observed By:** DME

**Eval Type:** INTERACTION

**Eval Location:** SHELTER

**Result:** PAIRED EASY

Interaction: AVOID SOCIAL

Canine A572088 was easily paired with A575152

<b>7/10/2025</b>	<b>Name and ID:</b> *Gloria (A572088)
<b>Observed By:</b> SLP <b>Eval Type:</b> INTERACTION <b>Eval Location:</b>	<b>Result:</b> FIGHT IN KENNEL
<p>ABC 175 heard commotion from WD46. 175 ran over and saw volunteer banging on the kennel. When 175 got to the kennel, both dogs had separated. Volunteer informed 175 that A572088 was the instigator and was on top of A424189. Dogs were separated by divider and 175 asked kennel staff to repair. No injuries observed but minor cut to A424189's gums.</p>	
<b>7/5/2025</b>	<b>Name and ID:</b> *Gloria (A572088)
<b>Observed By:</b> MDL <b>Eval Type:</b> INTERACTION <b>Eval Location:</b> SHELTER	<b>Result:</b> PAIRED EASY  <b>Recommendations:</b> ADVANCED HANDLER
<p>Interaction: AVOID SOCIAL</p> <p>Paired A575513 with A572088. Both dogs able to sniff and walk away, avoided each other after.</p>	
<b>6/30/2025</b>	<b>Name and ID:</b> *Gloria (A572088)
<b>Observed By:</b> BLB <b>Eval Type:</b> ABC <b>Eval Location:</b>	<b>Recommendations:</b> ADVANCED HANDLER
<p>Interaction: SEEK SOCIAL</p> <p>181 pulled A572088 for assessment: A572088 was at the back of her kennel and ran to the front when handler approached, barking once, then calmed down. She was leashed easy, pulling slightly to get outside. Once in yard, A572088 relieved herself right away, then took turns between exploring the yard and seeking social with handler. A572088 showed no barrier reactivity to people or dogs while out in the yard. Returned to kennel with no issue.</p>	
<b>6/29/2025</b>	<b>Name and ID:</b> *Gloria (A572088)
<b>Observed By:</b> <b>Eval Type:</b> VOLUNTEER <b>Eval Location:</b> PLAY YARD	<b>Result:</b> PAIRED EASY  <b>Recommendations:</b> ADVANCED HANDLER
<p>What a sweetie! Loved everyone she met, seems to know sit, is gentle, and likes to play catch.</p>	
<b>6/26/2025</b>	<b>Name and ID:</b> *Gloria (A572088)
<b>Observed By:</b> MRL <b>Eval Type:</b> INTERACTION <b>Eval Location:</b> SHELTER	<b>Result:</b> PAIRED EASY  <b>Recommendations:</b> ADVANCED HANDLER
<p>Paired A574291 (female) with A572088 (female). Both dogs sniffed each other and then kept space. both dogs had low energy.</p>	

<b>6/24/2025</b>	<b>Name and ID: *Gloria (A572088)</b>
<b>Observed By:</b> <b>Eval Type:</b> INTERACTION <b>Eval Location:</b> PLAY YARD	<b>Result:</b> PAIRED EASY  <b>Recommendations:</b> ADVANCED HANDLER
<p>Able to leash and return at rear of kennel with no reactivity on multiple occasions. On vol potty list as she consistently urinates immediately outside, often blocking traffic on sidewalk, for a minute or more. Signs of being house trained continue in play yard. As she becomes more comfortable, receptive to social contact and steps into pool for treats. Sweet senior.</p>	
<b>6/14/2025</b>	<b>Name and ID: *Gloria (A572088)</b>
<b>Observed By:</b> MA <b>Eval Type:</b> INTERACTION <b>Eval Location:</b> SHELTER	<b>Result:</b> PAIRED EASY  <b>Recommendations:</b> ADVANCED HANDLER
<p>Interaction: SEEK SOCIAL</p> <p>Paired A572088 easily with A568019. A572088 was very interested in A568019 and A568019 was very indifferent. No aggression observed in either dog, Left paired.</p>	
<b>6/7/2025</b>	<b>Name and ID: *Gloria (A572088)</b>
<b>Observed By:</b> BLB <b>Eval Type:</b> ABC <b>Eval Location:</b>	<b>Recommendations:</b> ADVANCED HANDLER
<p>Interaction: SEEK SOCIAL</p> <p>175 and 181 pulled A572088 for assessment: A572088 came to the front of her kennel, non reactive towards handlers, and allowed leashing. She pulled to get outside but went potty before even reaching the yard. A572088 seems VERY potty trained as she went multiple times. She sought social and allowed handling. Returned to kennel easy.</p>	
<b>6/4/2025</b>	<b>Name and ID: *Gloria (A572088)</b>
<b>Observed By:</b> EG <b>Eval Type:</b> ABC <b>Eval Location:</b> PLAY YARD	<b>Recommendations:</b> ADVANCED HANDLER
<p>Interaction: SEEK SOCIAL</p> <p>ABC 180 took out A572088 for assessment. A572088 was very kennel reactive, redirecting at her kennel mate. Once I opened the kennel door, A572088 stopped lunging and barking and allowed leashing easily. A572088 did not pull to the play yard. Once in the play yard, A572088 sought social and allowed full handling. A572088 was easily put back into the kennel and unleashed.</p> <p>Recommendation: Move down to advanced as no issues presented once out of the kennel.</p>	

5/31/2025

Name and ID: \*Gloria (A572088)

**Observed By:** GGF

**Eval Type:** INTERACTION

**Eval Location:** SHELTER

**Recommendations:**

STAFF ASSISTANCE  
ONLY

A572088 keeps charging at the kennel door. In in the morning to move over will charge and bark with flag tail and hackles up. can't go in the kennel to move over due to her doing this. Moving to staff only and putting on a temp.

5/21/2025

Name and ID: \*Gloria (A572088)

**Eval Type:** FIELD

**Eval Location:** FIELD

Field: AVOIDS SOCIAL

---

**Observed By:** SML

**Eval Type:** INTAKE

**Eval Location:** SHELTER

Intake: SEEK SOCIAL

Easy to handle

---

**Observed By:** MA

**Eval Type:** INTERACTION

**Eval Location:** SHELTER

**Result:** PAIRED EASY

Interaction: AVOID SOCIAL

Paired A572088 easily with A569502. Both dogs were avoidant but when A572088 approached A569502 to sniff, A569502 gave a corrective bark. The remainder of the interaction both dogs were avoidant. Left paired.

-----End of Behavior Notes -----

## \*GLORIA'S MEDICAL HISTORY

7/30/2025

Name and ID: \*GLORIA (A572088)

Treated by:

PROVETA ADVANCED DOG  
STRONGID-T

7/27/2025

Name and ID: \*GLORIA (A572088)

TECH NOTE                      NORMAL                      0.00LBS                      Treated by: LH

Replaced e-collar cageside

TECH NOTE                      NORMAL                      0.00LBS                      Treated by: TW

Recheck with Dr, R perineal mass removal site, L caudal thigh mass removal site, also 7 day recheck incision +/- remove e-collar AND COMPLETE E-COLLAR TO-DOS vs extend E collar 1 more week due to mass removals

-Incisions all healing within normal limits.  
- Ok to remove the e-collar.

7/20/2025

Name and ID: \*GLORIA (A572088)

Treated by:

PROVETA ADVANCED DOG  
E-COLLAR  
0.15 BUPRENORPHINE SR 10MG/ML 1.00 TIMES/DAY FOR 1.00 DAYS  
0.10 ANTISEDAN 1.00 TIMES/DAY FOR 1.00 DAYS  
1.84 KMB 1.00 TIMES/DAY FOR 1.00 DAYS

7/19/2025

Name and ID: \*GLORIA (A572088)

VET EXAM                      TUMORS                      58.60LBS                      98.20                      Treated by: LH

Pre-Surgical Examination:

Physical Exam: BAR

Sex: Intact female

Nose: No discharge

Eyes: No discharge

Heart/lungs: within normal limits HR 120 bpm RR 20 bpm

Special notes: Large right perineum pendulous skin mass. Also left thigh skin mass. Non-reducible umbilical hernia.

Suitable for Surgery: Yes, spay and rear mass removal

7/12/2025

Name and ID: \*GLORIA (A572088)

VET EXAM                      OTHER                      0.00LBS                      Treated by: LH

Vet exam note:

Reason for exam: Possible uti? Frequent squatting to urinate with no urine present (vet exam request)

Findings: BAR, no eye or nasal discharge, BCS 6-7/9 overweight, RR barking bpm, normal ambulation, possible in heat, engorged vulva. No frequent squatting to urinate noted during cage side exam.

Recommendations:

-recommend spay

**6/25/2025****Name and ID: \*GLORIA (A572088)**

Treated by:

4.00 PROVECTA ADVANCED DOG 1.00 TIMES/DAY FOR 1.00 DAYS  
STRONGID-T

**6/5/2025****Name and ID: \*GLORIA (A572088)**

VET EXAM                      OTHER                      0.00LBS                      Treated by: NMO

Re: Recheck for resolution of clinical signs of URI on day 7 of doxy +/- additional tx/dx

Obs : BAR/tail wagging, no eye or nasal discharge, BCS 5/9, RR 20bpm, normal ambulation, no coughing or sneezing.

Plan: URI appears resolved, email Kennel/Clinic Supervisors. Monitor for relapses.

**6/2/2025****Name and ID: \*GLORIA (A572088)**

VET EXAM                      OTHER                      0.00LBS                      Treated by: NMO

Re: Recheck attitude, URI under treatment, reported lethargic, open mouth breathing on 6/1 (not seen) +/- pneumonia xrays if needed?

Obs: BAR/tail wagging/barking non-stop, no eye or wet nose - clear, BCS 5/9, RR 20bpm, normal movement/ambulation, she pants and barks right at the kennel door.

Plan: Monitor, the warmer weather does cause dogs in kennels to become quiet and save their energy so they dont over heat.

**6/1/2025****Name and ID: \*GLORIA (A572088)**

TECH NOTE                      UNABLE                      0.00LBS                      Treated by: LH

Reason for note: Unable to medicate this morning due to not eating medication with treats or food. Tried twice with no luck.

Findings:  
-cageside

VET EXAM                      NASAL DISCHARGE                      0.00LBS                      Treated by: LH

Vet exam note:

Reason for exam: open mouth breathing; thick green nasal discharge; lethargic/depressed personality (vet exam request)

Findings: BAR, no eye discharge, moderate clear to white nasal discharge, BCS 6/9, RR barking bpm, normal ambulation, no lethargy or open mouth breathing noted. Intermittent coughing. URI under treatment.

Recommendations:

-continue Doxycycline  
-recheck tomorrow as precaution

**5/31/2025****Name and ID: \*GLORIA (A572088)**

VET EXAM                      NORMAL                      0.00LBS                      Treated by: LH

Vet exam note:

Reason for exam: Recheck for resolution of clinical signs of URI on day 7 of doxy +/- additional tx/dx (vet exam request)

Findings: BAR, BCS 6/9. no eye discharge. Moderate yellow mucoid nasal discharge, intermittent coughing, URI under treatment. Currently on Doxy until 6/6.

Recommendations:

-continue Doxycycline as previously prescribed. Has recheck 6/5 at end of meds

**5/30/2025**

Name and ID: \*GLORIA (A572088)

VET EXAM                      COUGHING                      61.00LBS                      Treated by: NMO

Re: 1. thick green nasal discharge; hacking. 2. coughing alot and phlegm coming out from nostrils.

Obs: BAR/body wagging, no eye discharge, yellow mucoid nasal discharge, BCS 5/9, RR 20bpm, sternal.  
Coughing = URI. Ate treat offered.

Plan:

-rx Doxycycline 10 mg/kg x 7d

-recheck in 7 days for recheck URI: Recheck for resolution of clinical signs of URI on day 7 of doxy +/-  
additional tx/dx

-emailed kennel supervisors regarding new URI

-request tech exam for First dose Doxycycline today - done

Treated by:

3.00 DOXY100 1.00 TIMES/DAY FOR 8.00 DAYS

Treated by:

CARPROFEN 100MG

**5/22/2025**

Name and ID: \*GLORIA (A572088)

TECH NOTE                      TUMORS                      0.00LBS                      Treated by: CGO

Reason for note:

Evaluate masses w/ DVM, document. \*\*Temp\*\* may be an issue, be careful.

Findings:

Pendulous mass noted cranial perenium, cranial to rectum/anus

Pendulous mass left stifle/thigh

Will need evaluation and treatment at full service veterinary practice for specific diagnosis/treatment.

Monitor

FOSTER

## **Behavior Observation Report**

**8/21/2025**

**Name and ID:** \*Toffee (A574035)

**Observed By:** KCT

**Eval Type:** ABC

**Eval Location:** SHELTER

08/21/25 08:40HRS - Notes from memo regarding information collected from foster. KCT

08/15/25 15:35 SLP talked to foster about concerns regarding A574035's behavior in the home setting. Foster informed SLP that A574035 was showing pretty extensive reactivity towards other animals since leaving the shelter. Foster stated that A574035 will attack anything that shows her reflection. Examples of items she has attacked: mirrors, the refrigerator, a guitar, etc. Foster said that she has been trying to work on desensitizing her with her dog and has gotten A574035 close without heavy reaction, but the behavior has been consistent. Foster said she would send SLP video footage of her attacking an item, but that A574035 has been much worse than the footage. Foster said that it can be very difficult to get A574035 to calm down and get her to stop fixating and she has had to resort to covering A574035's head with a blanket when she becomes hard to control. SLP consulted with her about the behavior and how concerning it was. SLP asked Foster if she thought A574035 would hurt another animal if given the chance and Foster said yes. SLP consulted with Foster that A574035 may not be a safe candidate for adoption and SLP said she didn't want Foster or her dog getting hurt. Foster understood. Foster stated she would send the video footage and we would go from there.

**8/20/2025**

**Name and ID:** \*Toffee (A574035)

**Observed By:** SLP

**Eval Type:** ABC

**Eval Location:**

**Interaction:** LUNGES / SNAPS

**Recommendations:**

RESCUE ONLY

Due to reported extensive animal reactivity in the home setting, even so resorting in attacking reflections, discussed in pathways. Rescue Only.

**7/14/2025**

Name and ID: \*Toffee (A574035)

**Observed By: BLB**

**Eval Type: ABC**

**Eval Location:**

Interaction: SEEK SOCIAL

181 and 180 pulled A574035 for assessment: A574035 was very wiggly in her kennel and began jumping in excitement when handler was attempting to leash but allowed it - walked well on leash. Once in yard, A574035 got the zoomies then took turns between seeking social with handlers and exploring the yard. Returned to kennel without issue.  
Recommendation: lower to ok for all.

**6/17/2025**

Name and ID: \*Toffee (A574035)

**Observed By: SLP**

**Eval Type: ABC**

**Eval Location:**

**Recommendations:**

ADVANCED  
HANDLER

Interaction: SEEK SOCIAL

ABC 175 and 181 pulled A574035 for assessment. A574035 gave a low tail wag and allowed leashing easily. On leash, A574035 walked very well with minimal pulling. In yard, A574035 sought social with handlers a majority of outing. A574035 jumped in handlers' laps and was very affectionate, allowing full handling. No issues placing back into kennel.  
Recommendation: Lower down to Advanced Handler due to walking better on leash.

**6/13/2025**

Name and ID: \*Toffee (A574035)

**Observed By: DER**

**Eval Type: INTAKE**

**Eval Location: SHELTER**

**Result: PAIRED EASY**

**Recommendations:**

STAFF ASSISTANCE  
ONLY

Intake: SEEK SOCIAL

fearful, but very sweet and friendly. Walks slow on leash and allows to be picked up and carried. Made staff only due to pancake when scared on leash and needing to be carried.

Paired easy with A505025 (avoidant, shy, spayed female).

**8/16/2025**

**Name and ID:** \*Ribbit (A577557)

**Observed By:** SLP

**Eval Type:** ABC

**Eval Location:**

**Recommendations:**

RESCUE ONLY

ABC 175 and 181 went to move A577557 to CONDO-11. A577557 did not want to be leashed and kept running from handlers in the kennel. Drain in the kennel was out and she kept going under it. 181 was able to get the leash on and A577557 slowly came out of the kennel. A577557 was very slow moving and kept putting the brakes on. It took handlers a good 5-10 minutes to get her from ISO to CONDO-11. In CONDO-11, A577557 was aloof and laid down. 175 went to go get a comforter and heartworm test. When returned to CONDO-11, A577557 was growling loudly. 175 slowly was able to lasso A577557 from afar to which she snapped at it a few times. Handlers opted she may do best as R Only due to consistent selective handling and moved back to ISO. A577557 allowed handlers to pick her up and place her on dolly to move her back to ISO.

**8/13/2025**

**Name and ID:** \*Ribbit (A577557)

**Observed By:** SLP

**Eval Type:** ABC

**Eval Location:**

**Recommendations:**

STAFF ASSISTANCE  
ONLY

ABC 175 and 180 pulled A577557 for re-assessment. A577557 was avoidant of the leash, but did not snap at it this time. Once leash was on, A577557 came out of the kennel. A577557 slowly walked outside where handlers sat down with A577557. A577557 was aloof but allowed handling and petting without issue. A577557 was able to be placed back into kennel without issue.  
Recommendation: Staff Assist. No kids. Behavior consult due to leash sensitivity and handling sensitivity.

**Recommendations:**

STAFF ASSISTANCE  
ONLY RESCUE ONLY

Interaction: AVOID SOCIAL

ABC 175 went to assess A577557. A577557 was avoidant in the corner of the clinic kennel. When 175 attempted to lasso A577557, A577557 snapped at the leash a few times. A577557 did not pursue handler, but instead remained avoidant and fearful. Once leash was on, A577557 came out of the kennel willingly. A577557 did have to be gently coaxed throughout walk as she had a significant limp. In yard, A577557 remained aloof and avoidant, but did not display outward aggression. A577557 allowed butt scratches and petting, but was very leery of over-the-head movements. A577557 allowed being placed back into kennel without issue.

Recommendation: Staff Assist. No kids. Fear reactive with leashing and sensitive to handling. Pursue rescue placement?

**Observed By:** CWC

**Eval Type:** FIELD

**Eval Location:** FIELD

Field: LUNGES / SNAPS

THE DOG HAD A MUZZLE ON FROM THE VEC. THE VET TECH HAD PICKED UP THE DOG AND THE DOG TRIED TO BITE THE TECH EVEN THOUGH IT WAS MUZZLED TO AVOID BEING PICKED UP. THE DOG WAS PLACED ON THE TRUCK AND THE VET TECH WAS ABLE TO GET THE LEASH OFF THE DOG BY THROWING A TOWEL OVER HER FACE.

I WAS ABLE TO LEASH HER OUT OF THE BAY IN THE TRUCK AFTER MULTIPLE ATTEMPTS WITH HER SNAPPING. I PUT A TOWEL OVER HER HEAD TO HELP LEASH HER AND WAS ABLE TO PICK HER UP WITH THE TOWEL ON HER FACE AND A BLANKET AS A BARRIER.

## \*RIBBIT'S MEDICAL HISTORY

8/19/2025

Name and ID: \*RIBBIT (A577557)

VET EXAM                      OTHER                      0.00LBS                      Treated by: CGO

CAGESIDE EXAM (VISUAL EXAM ONLY)

Reason for Exam: Vet exam request (Recheck gait right front leg on trial of Gabapentin instead of Carprofen +/- refill Carprofen)

Temp and Pulse: Unable - visual exam only

Mentation: QAR

Respiratory Effort & Rate: Eupenic

Pain Level: No clinical signs of pain

Nasal discharge: None

Eye discharge: None

BCS: NA

Skin/Coat: See previous exam notes;

Location/Type of wounds/hairloss: NA

Ambulation: Weight bearing all four

Elimination: Normal

Additional observations:

Assessment: Stable

Recommendation(s): Request evaluation of gait in clinic with DVM +/- additional dx/tx. Notified NLD due email with concerns about ambulation from SLP recommend considering schedule sterilization for repeat radiographs +/- additional dx/tx.

\*\*If this pet is returned to its previous or original owner and has medical conditions, please issue an official notice for followup vet care (see OCAS veterinarian for timeframe).

Name and ID: \*RIBBIT (A577557)

VET EXAM                      LIMPING                      0.00LBS                      Treated by: LH

Vet exam note:

Reason for exam: completed 8/18 vet exam, Recheck limping R front +/- refill Carprofen. Caution temp. Or switch to Gabapentin? (vet exam request)

Findings: BAR, no eye or nasal discharge, BCS 6-7/9 overweight, RR 20bpm. Healing scars on front legs.

Mild to moderate swelling R elbow, see previous notes regarding elbow changes on xrays. Weight bearing lame right front suspect due to chronic bony changes. Moderate hairloss dorsum, flea allergy dermatitis, continued. Same as previous.

Recommendations:

- medically ok for general, prefer calm cage mate or single dog if available due to limping

-trial of Gabapentin instead of Carprofen

-recheck in 2 and 7 days

-Recommend follow up at own veterinarian after adoption, rescue, or RTO for further testing and treatment of limping, bony elbow changes on xrays

Treated by:

GABAPENTIN 300MG

8/14/2025

Name and ID: \*RIBBIT (A577557)

DIAGNOSTIC

IDEXX+

0.00LBS

Treated by:

TEST: Anti-Mullerian hormone

## TEST RESULT:

Anti-Mullerian hormone: 0.35 ng/ml Positive

Comments: Anti-Mullerian hormone level is positive. Anti-Mullerian Hormone (AMH) ELISA: The qualitative AMH test for dogs and cats is meant to distinguish between spayed and ovary intact bitches and queens after they have reached the age of sexual maturity (varies by breed). A negative AMH test is consistent with a spayed female. A positive AMH test indicates the presence of ovaries. An inconclusive AMH result cannot distinguish between the intact and spayed conditions. The AMH test has been evaluated for the ovarian remnant syndrome, and a positive test is consistent with the presence of a remnant. A negative test does not rule out the ovarian remnant syndrome. Intact females tested after reproductive senescence may have a negative AMH test. Progesterone baseline testing is recommended in conjunction with AMH if clinical signs are consistent with a remnant.

VET EXAM

OTHER

0.00LBS

Treated by: LH

Vet exam note:

Reason for exam: Recheck wounds on the right front limb for resolution on empirical treatment at end of meds +/- additional dx/tx. +/- okay for general/ ISO? (vet exam request)

Findings: BAR, no eye or nasal discharge, BCS 6-7/9 overweight, RR 20bpm. Moderate brown crusting healing wounds on right elbow and scars on right front leg, scars on left front, healing well. Mild to moderate swelling R elbow, see previous notes regarding elbow changes on xrays. Weight bearing lame right front suspect due to chronic bony changes. Moderate hairloss dorsum, flea allergy dermatitis.

## Recommendations:

- medically ok for general, prefer calm cage mate or single dog if available due to limping
- refill Carprofen for 1 week then recheck
- Recommend follow up at own veterinarian after adoption, rescue, or RTO for further testing and treatment of limping, bony elbow changes on xrays

Treated by:

CARPROFEN 75MG

VET EXAM                      OTHER                      0.00LBS                      Treated by: CGO

CAGESIDE EXAM (VISUAL EXAM ONLY)

Reason for Exam: Vet Exam Request

Recheck wounds on the right front limb for resolution of toe touching and swelling on empirical treatment

Q3days +/- additional dx/tx. +/- okay for general/ISO?

Temp and Pulse: Unable - visual exam only

Mentation: QAR

Respiratory Effort & Rate: Eupenic

Pain Level: Moderate

Nasal discharge: None

Eye discharge: None

BCS: NA

Skin/Coat:

Location/Type of wounds/hairloss: See previous notes

Ambulation: Toe touching (right front)

Elimination: None

Additional observations:

Assessment: Continued limping

Recommendation(s):

Tech exam Radiographs right forelimb and BupeSR

\*\*If this pet is returned to its previous or original owner and has medical conditions, please issue an official notice for followup vet care (see OCAS veterinarian for timeframe).

Treated by:

0.11 BUPRENORPHINE SR 10MG/ML 1.00 TIMES/DAY FOR 1.00 DAYS

RADIOGRAPH                      OTHER                      0.00LBS                      Treated by: CGO

Technician acquired radiographs. Please reach out to ClinicCare@ocfl.net to receive radiographs.

Reason for request/veterinarian's instructions: Gravid check, (R) front leg

Part: Extremity and Abdomen

Views: (R) Lateral and DV

Veterinarian's observations:

-Suspect C-section scar vs other; rec. spay check

-No mineralized fetuses noted

-Mild to moderate gas distension of stomach

-Normal serosal detail

-Bridging discospondylosis

-Dx spinal arthritis

-Bone opacity fragment noted (R) cranial elbow w/ periosteal rxn radius

on DV suspect periosteal rxn (L) elbow, medial

-DDx open boney changes secondary infection, inflammation, injury vs other

-Recommend repeat xrays at time of sedation for sterilization of the front limbs to evaluate for resolution periosteal rxn.

\*\*This evaluation was for the purpose of screening/triage. For specific diagnosis and treatment, these radiographs need to be evaluated by a veterinary radiologist.

VET EXAM                      LIMPING                      0.00LBS                      Treated by: CGO

CAGESIDE EXAM (VISUAL EXAM ONLY)

Reason for Exam: Vet exam request (dog went to vec AND WILL NEED TO BE LOOKED AT IN AM WHEN 3RD SHIFT BRINGS IT IN.,)

Temp and Pulse: Unable - visual exam only

Mentation: QAR

Respiratory Effort & Rate: Normal

Pain Level: Mild to moderate

Nasal discharge: None

Eye discharge: None

BCS: NA

Skin/Coat: See previous exam notes;

Location/Type of wounds/hairloss: NA

Ambulation: Toe touching right front

Elimination: None

Additional observations: On empirical treatment for wounds

Assessment: Limping, Wounds

Recommendation(s): Continue medications and rechecks as prescribed. Recheck wounds Q3days for improvement on empirical treatment +/- additional dx/tx.

\*\*If this pet is returned to its previous or original owner and has medical conditions, please issue an official notice for followup vet care (see OCAS veterinarian for timeframe).

TRIAGE ASSESSMENT

Animal was brought to the Clinic for triage by Enforcement staff.

Temp: not done - visual exam only  
 Pulse: not done - visual exam only  
 Resp: 20 breaths per minute

Presenting problem: Went to VEC overnight

Assessment: QAR, BCS 5/9, not friendly, lunging and snapping, limited exam due to temp, intermittently limping on front right leg, punture wounds noted on front right leg, no active bleeding noted, suspect soft tissue injury of front right leg.

Recommendations: Rx Carprofen SID for 7 days. Rx Enrofloxacin SID for 7 days. Ok for takes. Place in clinic kennel.
